

HYMER Access Solutions
Product range

**HIGHEST QUALITY
FOR THE HIGHEST
LEVEL**

**Custom-fit access solutions and personal service from
professionals for professionals.**

HYMER

VERY GOOD IS NOT GOOD ENOUGH

Just having a very good product is not enough. Everything around it must also be very good. In our case, this means excellent customer service, competent advice and fast delivery.

We never tire of going a few steps further and a few steps higher to help you perform at your best. Simple, safe and fast.

International trade partners for direct, on-site support. This begins from selecting the right product, measurements for fixed ladders and much more.

Competent service and advice with added value

Short delivery times thanks to extended storage capacity

Digital order and handling support

THE BEST SOLUTION FOR SURE!

Every task makes specific demands on our access solutions. To meet these, our product range undergoes constant review – from our perspective and from the perspective of users in industry and the trades. This results in adjustment and optimisation that have one thing in common: maximum functionality.

We make our customers' lives easier. From ordering and usage through to customer service. Based in Wangen in Germany, we have been doing this for 60 years – with access solutions of the highest quality, made in Germany.

**High-quality, durable
access products**

**Proven functions for
maximum work safety**

**Automation in making
access solutions**

**Working together with standardisation
bodies and external testing bodies**

LADDERS AND STEPS

Leaning and hookable ladders

Extension and rope-operated extension ladders

Freestanding ladders

Multipurpose ladders

Platform ladders and stockers' ladders

Products for special applications

Steps and working platforms

Accessories

Flexibility meets comfort

Not all ladders are the same. That's why we have every type: Single ladders, extension ladders, stepladders or everything in one as a multifunction ladder. With rope-pulls, platforms and tool trays. With spring-loaded castors and non-slip R13 surface. Whether high up or just one step away: We offer

long rope-operated ladders for high access as well as small steps for assembly and service work. As different as our models are, they all have one thing in common: the consistently high HYMER quality characterised by robust workmanship and high functionality.

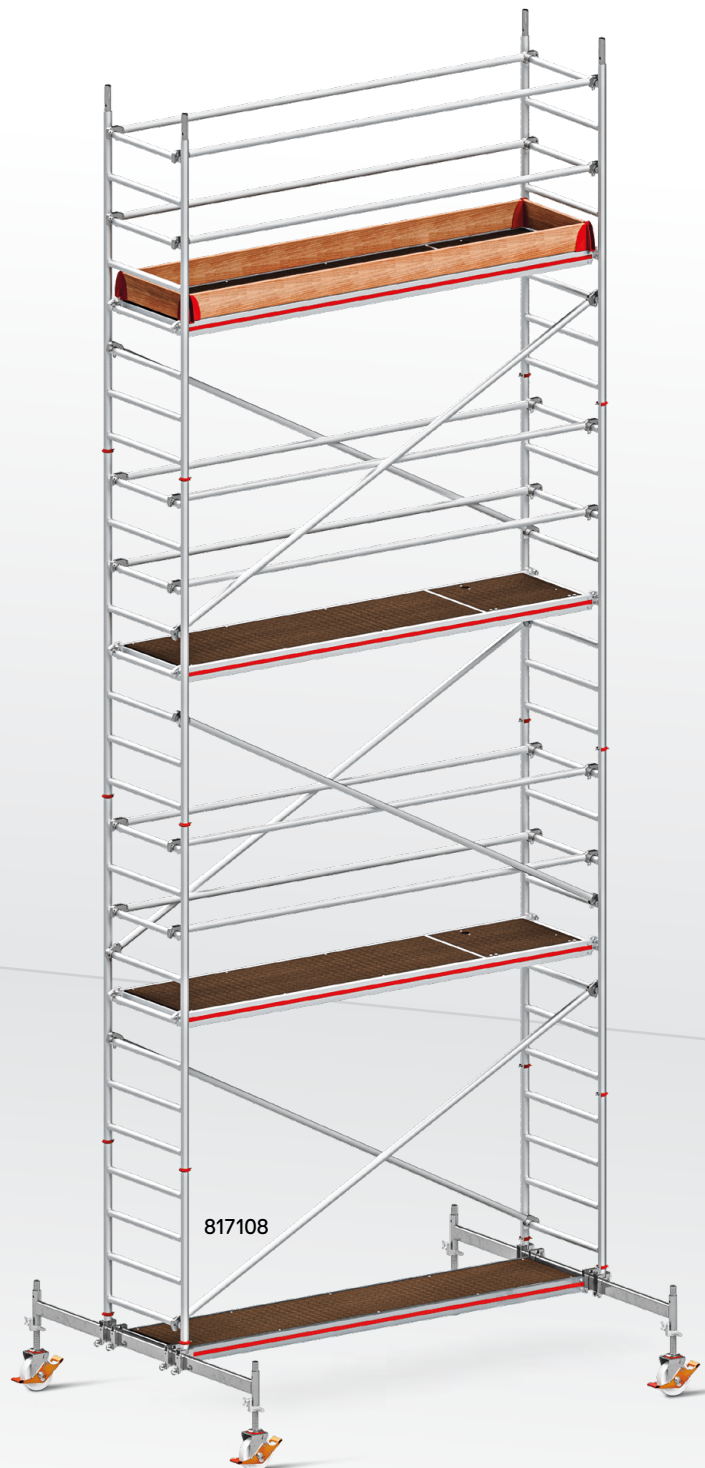

MOBILE TOWERS

**Mobile towers with
mobile cross-beams**

**Mobile towers with
stabilisers**

**Individual elements
and spare parts**

High safety – low set-up time

Working at heights is always challenging. Our mobile towers make it a little more comfortable, safe and flexible for all facade and indoor work. They are available with cross-beams for maximum flexibility and low set-up times, or with stabilisers for maximum stability and comfortable working.

Robust, well-thought-out details such as bayonet catches or the practical HYMER lifter mean fewer manual actions to make assembly and disassembly extremely fast.

STAIRS, PLATFORMS AND MAINTENANCE PLATFORMS

Modular solutions

Preassembled access solutions using the HYMER modular system

Special designs

Individualised solutions, tailored to specific sectors and specific customer requirements

Standard components for greater flexibility

We use our tried-and-tested and durable HYMER modular system for stairs, platforms and maintenance platforms. These standardised components enable flexible assembly with high availability and easy installation. Configuration is very simple using our online configurator. You decide which stair angle,

tread width and coverings are required. Preconfigured favourites are also available for quicker selection. If the standardised solutions in our modular system are not sufficient, we will be happy to design an individual solution tailored to your specific requirements.

FIXED LADDERS

DIN 18799-1 / -3

Fixed ladders on buildings

DIN 14094-1

Escape ladder, fire escape, escape route

EN ISO 14122-4

Access to machines and machinery systems

NF E85-016

Components in industrial plant, fixed access, fixed ladders
